Going into the Winter Mountains in a New Manner

Snowshoes are an ancient footwear for navigating in deep snow. Historical finds show that snowshoes originated in Central Asia 4,000–6,000 years ago. They are one of the most important reasons that we managed to move over large distances and in rugged terrain.

JUST AS IMPORTANT AS THE WHEEL

Many compare the transport significance of snowshoes with the invention of the wheel. The first snowshoes were very simple; but, after a while, they were facilitated for different terrain and snow conditions. The Innuits and Indians in North America developed the most advanced and diverse snowshoes.

FUN AND SUITS EVERYONE

Have you never used snowshoes? Then you should join one of our snowshoe trips. It doesn't matter that you don't have experience — snowshoes suit everyone. Snowshoe trips are fun and a great way to get out and enjoy the atmospheric winter landscape.

TRY
SNOWSHOES,
YOU ALSO

F R E E D O M

Using snowshoes in newly-fallen snow is magical and gives a real feeling of freedom.

GREAT FAMILY ACTIVITY

When going with a group, the most active can go first and pave the way for those farther back in line. Our snowshoe trips are organized by Geilo Aktiv, Vinternatt and Slaatta Ski Center. The guides adapt the trips after desired speed, incline, distance, and length, so that everyone has a fantastic winter experience. Family snowshoe trips are suitable for everyone with children over 6 years, and go in the wooded area around Slaatta Ski Center. The trip concludes with sledding on personal sledding boards and an enjoyable time at the Slaatta Sami tent. At the Sami tent, you bake stick bread, that is grilled over a bonfire. A great activity for the whole family!

SNOWSHOES FOR BEGINNERS OR AS A TRAINING SESSION?

"A little snowshoe trip by Vestlia" is a perfect program for beginners and families that want to try an easy, evening, snowshoe trip. The trip goes in beautiful surroundings by the Ustedalsfjorden lake, in a combination of woods and open, varied terrain.

If you would prefer a more physically demanding trip, or a different kind of training session, you can join a summit trip! Here, we go up the incline in powder snow, between the trees. You get good exercise, fresh air, and a different nature experience. We can promise that dinner tastes better after a summit trip!

Grand and Accessible

CROSS-COUNTRY SKIS

To go skiing with the Hallingskarvet mountains as scenery is a powerful experience. Cross-country ski tracks crisscross the area around the mountains. Several of these are tied to the Norwegian Trekkers Association's (DNT) ski tracks on the Hardangervidda plateau and Skarvheimen. Let the quiet and powerful nature envelop you.

Geilo and Hol municipality are among the best cross-country areas in Norway. Here you will find over 500 kilometers of groomed ski tracks, both in the valleys and on the mountain plateaus. Several of these are tied to the Norwegian Trekkers Association's (DNT) marked cross-country track network on the Hardangervidda plateau and Skarvheimen. In addition, you will find lighted ski tracks around the whole municipality: Hovet, Hagafoss/Hol, Geilo, Skurdalen, and Dagali.. The cross-country tracks around the Ustedalsfjorden lake feel like they are made for families with children, with information boards about the area's nature and culture.

Geilo's cross-country tracks keep a high standard throughout the whole winter. The ski tracks have a wide specter of skill levels. Everything from short, flat areas for beginners to more challenging routes along the mountain tops.

The cross-country season starts in October/November and lasts all the way to May. The most eager cross-country skiers can go skiing in the higher mountain areas until June. All the ski tracks are registered at skisporet.no, where you can find updates from when they have been groomed. The cross-country tracks are free to use, but you are welcome to support the local track and trail group in the area you use most or where you have your cabin/house. For the Geilo area, it is the "Geilo Track and Trail Group." Follow them on Facebook for trip suggestions and grooming updates.

FOOD SERVICE AND LOCAL FOOD

Local Food from the Mountain's Best Ingredients

Here, in upper Hallingdal, we are proud of our long food traditions. Through time, we have learned to utilize the fantastic, local ingredients that can only be found high in the mountains, because nature's food tray has a lot to offer. Juicy, green grass and fresh air give the best starting point for good milk. This results in good dairy products and tasty meat.

The Taste of the Mountains

Hol has the status as national park municipality and houses two national parks: Hardangervidda and Hallingskarvet. In the mountains, wild reindeer and goats graze; and in the waters, you can find beautiful and red mountain trout. Just as fantastic for dinner as smoking or corning, or other preparations. In the marshes, grow cloudberries; in the woods grow blueberries, crow berries, lingonberries, and mushrooms.

Small and Good

In Geilo and in Hol, you will find a wide selection of small cheese-makers, meat and fish processing companies, restaurants, and bakeries that know to use the valuable ingredients. If you visit the mountain's food service cabins, delicatessens, and grocery stores, they also all offer locally-produced food. Explore and enjoy local food from the mountain. Check out, for example, the Cheese Village. They have their own eco-museum, café, and a world class cheese shop!

Food Service High and Low

Geilo has a large selection of restaurants that offer food and beverages in all variations. From a simple meal to the tastiest menus with accompanying drink. Food service can be found in the center, in the hamlets, at the ski slopes, and along the trails up in the mountains. Geilo also has a nice nightlife with several bars and pubs.
